

# Singlemode NZDSF

|   |                                  |
|---|----------------------------------|
| Fibre type  | G.655.D                          |
| OPK code  | 655                              |
| Core  | Germanium doped Silica           |
| Cladding  | Pure Silica                      |
| Coating   | Dual layers of UV-cured acrylate |
| <b>Optical Characteristics</b>  |                                  |
| Attenuation coefficient Loose tube Cables (Typical / Maximum) (1,2)     |                                  |
| @1550 nm  | 0.23 / 0.4 dB/km                 |
| @1625 nm  | 0.26 / 0.4 dB/km                 |
| Attenuation coefficient Tight Buffered Cables (Typical / Maximum) (1,2) |                                  |
| @1550 nm  | 0.26 / 0.4 dB/km                 |
| @1625 nm  | 0.31 / 0.4 dB/km                 |
| Attenuation discontinuity (2)   | ≤ 0.1 dB                         |
| Cable cut-off wavelength  | ≤ 1450 nm                        |
| Chromatic dispersion at 1460 ~ 1550 nm                                  | -4.2 – 6.2 ps/(nm·km)            |
| Chromatic dispersion at 1550 ~ 1625 nm                                  | 2.8–11.2 ps/(nm·km)              |
| Chromatic dispersion at 1530 nm   | 2.0–5.5 ps/(nm·km)               |
| Chromatic dispersion at 1565 nm   | 4.5–6.0 ps/(nm·km)               |
| Maximum individual fiber PMD  | ≤ 0.15 ps/√km                    |
| Fiber PMD link value  | ≤ 0.1 ps/√km                     |
| <b>Geometrical Characteristics</b>                                      |                                  |
| Mode field diameter @1550 nm  | 9.6 ± 0.4 μm                     |
| Core/Cladding concentricity error                                       | ≤ 0.5 μm                         |
| Cladding diameter   | 125.0 ± 0.7 μm                   |
| Cladding non-circularity  | ≤ 0.7 %                          |
| Primary coating diameter (uncoloured fibre)                             | 242 ± 5 μm                       |
| Primary coating diameter (coloured fibre)                               | 250 ± 10 μm                      |
| Fibre curl radius   | ≥ 4.0 m                          |
| Coating-Cladding concentricity  | ≤ 12 μm                          |
| <b>Macrobending loss</b>  |                                  |
| 100 turns, mandrel radius 30 mm @1550 nm                                | ≤ 0.05 dB                        |
| 100 turns, mandrel radius 30 mm @1625 nm                                | ≤ 0.05 dB                        |
| 1 turn, mandrel radius 16 mm @1550 nm                                   | ≤ 0.5 dB                         |
| 1 turn, mandrel radius 16 mm @1625 nm                                   | ≤ 0.5 dB                         |
| <b>Mechanical Characteristics</b>                                       |                                  |
| Proof test level  | ≥ 100 kpsi (1.0% strain)         |
| Coating strip force   | 1.3 ~ 8.9 N                      |
| Dynamic fatigue resistance parameter                                    | ≥ 20                             |

(1) Unless stated otherwise directly in the cable specification

(2) Cabled fibre

- Typical attenuation is the value measured for at least 90% of the fibers in the cable.
- OTDR measurement values can only be guaranteed for cable lengths of 1000 m and more.
- Cable on the reel may show a discontinuity of the OTDR curve caused by winding of the cable on the reel.
- The above values apply, unless otherwise stated directly in the cable specification
